EXPERIENCE

ASSOCIATE ANALYST

WIPRO | FEB 2019 - NOV 2020

- As an associate analyst my role is to configure client requirements into the system, Configuring involves using graphical user interface tools to customize code to fix a system defect or update the system per change orders.
- Well acquainted with all phases of SDLC and STLC.
- Responsible for testing the code which involves going through the whole testing phase (from Unit Testing till Regression), writing the test cases and debugging issues/defects prior to the code being moved to production.
- Write DB2 queries based on requirements to analyze the data. Work on the mainframe to perform certain sets of operations.

ANALYST

WIPRO | DEC 1 - PRESENT

- As an analyst, my role is to perform medium to high complexity system changes based on the client requirements. Analyzing issues/defects and debugs the system when the configuration is not producing expected results.
- Responsible for doing RCA, pulling system error reports using Tableau, identify major production issues, and accordingly analyzing and resolving the same. Work on Thunderhead to configure the communications statements through logical inputs/outputs based on various classes.
- Creating complex test plans to check the various system changes.

PROJECTS

FITNESS EDGE APP | ANDROID, FIREBASE

- Developed an Application for the Fitness Edge Gym which provides various workouts and activities information.
- Implemented various modules like Calorie Consumption, Step Counter, Fat Calculator, BMI and BMR calculator
- Used Crashlytics to identify various bugs or crash within the app.

MOTION ACTIVATED SURVEILLANCE SYSTEM | JAVA, OPEN CV

- A video capture surveillance system software that records the footage if there is a motion in a scene. Added
- Support for the sensitivity of motion to detect the various size of movements, threshold and alarm.
